PROFESSIONAL SUMMARY

I am a passionate Information Technology undergraduate and aspiring Full-Stack Developer with hands-on experience in building modern web applications and software solutions. Through both academic projects and professional experience, I have developed strong skills in frontend and backend development, working with technologies such as React, Next.js, TypeScript, Spring Boot, AWS Cloud, SQL, and Power BI. I enjoy transforming ideas into practical, user-friendly applications that solve real-world problems and deliver meaningful value. My experience working in collaborative and Agile environments has strengthened my problem-solving, communication, and teamwork abilities. I am committed to continuous learning and innovation, always seeking opportunities to expand my technical expertise and contribute to impactful digital solutions.

WORK EXPERIENCE

Full Stack Developer | JAN 2025 – Present

Ollcode (Remote) - Colombo 02

- Develop and maintain full-stack web applications using modern web technologies.
- Implement new features, fix bugs, and integrate frontend and backend APIs.
- Research, design, and develop scalable solutions to improve system functionality.
- Collaborate with cross-functional teams in an Agile environment to deliver high-quality software.
- Participate in code reviews and contribute to improving application performance and maintainability.

Work Project Highlights

Place Risk Solution

Construction Risk Assessment Platform (Singapore Client)

Developed and maintained a full-stack web application consisting of Admin, Client, and Assessment portals for managing construction risk assessments. Contributed to frontend development, backend API integration, feature implementation, and system enhancements.

Custom IoT Building Management System (BMS)

Enterprise IoT Monitoring Platform – Tapro Singapore

Contributed primarily to frontend development of an enterprise-grade Building Management System used for monitoring and controlling thousands of IoT devices across commercial buildings. Collaborated closely with backend developers to implement dashboards, RBAC features, and real-time monitoring capabilities.

Web Developer (Part-Time) | JAN 2025 – AUG 2025

Netwix (Remote) - Australia

- Developed and maintained responsive web applications for client projects.
- Implemented frontend features and integrated backend services to deliver end-to-end functionality.
- Enhanced application performance, usability, and user experience through continuous improvements.
- Collaborated with remote team members to develop, test, and deploy new features.
- Assisted in troubleshooting and resolving technical issues to ensure reliable application performance.

Work Project Highlights

Salon Management & Appointment Booking System

Developed the administrative dashboard and appointment booking platform for salon operations. Implemented scheduling, appointment management, configurable system settings, and accessibility improvements, including support for users with color vision deficiencies.

Dye House Clerk Assistant | APR 2022 – OCT 2022

South Asia Textile – Pugoda

- Maintained production and dyeing records to ensure accurate operational documentation.
- Prepared daily and monthly reports to support production monitoring.
- Coordinated with production staff to ensure smooth workflow and accurate record management.
- Assisted with administrative tasks and documentation within the dye house department.
- Supported data organization and process efficiency in daily manufacturing operations.

EDUCATION

Bachelor of Science Honours in Information Technology | 2022 - 2026

Sri Lanka Institute of Information Technology (SLIIT)

G.C.E. Advanced Level Examination (Physical Science Stream) | 2020

Vishaka Girls' School - Sapugaskanda

- Combined Mathematics - C
- Physics - C
- Chemistry - S

G.C.E. Ordinary Level Examination | 2017

Vishaka Girls' School - Sapugaskanda

- 7 A's and 2 B's

ACADEMIC PROJECTS

Online Teacher Trainee Management System (Group Project)

- Developed a web-based management system to streamline teacher trainee registration, record management, and administrative processes.
- Implemented responsive user interfaces, backend functionalities, and database integration for efficient data management.
- **Tech Stack:** HTML, CSS, JavaScript, Java, SQL

Mandrillife Product Selling System (Group Project)

- Developed a responsive e-commerce web application for managing products, customer orders, and online sales.
- Collaborated on frontend development, backend integration, and database connectivity to deliver a complete shopping experience.
- **Tech Stack:** React.js, Node.js, MongoDB, JavaScript

Mandrillife Product Selling Database (Group Project)

- Designed and implemented a NoSQL database to support product management, customer information, and order processing.
- Developed backend APIs to integrate the database with the web application.
- **Tech Stack:** MongoDB, Node.js, React.js

Pet Care Mobile Application UI Design (Individual Project)

- Designed a modern and user-friendly mobile application interface focused on pet care services and user experience.
- Created wireframes, user flows, and interactive prototypes following UI/UX design principles.
- **Tech Stack:** Figma

Mobile Game Application (Individual Project)

- Developed an Android mobile game featuring interactive gameplay, responsive controls, and object-oriented programming concepts.
- Designed game logic and user interactions to provide an engaging mobile gaming experience.
- **Tech Stack:** Kotlin, Java, Android Studio

Task Management Mobile Application (Individual Project)

- Developed a fully functional Android application for creating, organizing, and tracking daily tasks.
- Implemented task management features with an intuitive user interface to improve productivity.
- **Tech Stack:** Kotlin, Java, Android Studio

Salon Management System

- Developed a responsive web application for salon appointment scheduling and business management.
- Implemented appointment booking, customer management, and administrative features to streamline salon operations.
- **Tech Stack:** Next.js, React.js, TypeScript

Vehicle Rental Management System

- Developed a modern web application for vehicle rental services with vehicle listings and online booking functionality.
- Built responsive interfaces and reusable components to enhance usability and user experience.
- **Tech Stack:** Next.js, React.js, TypeScript

TECHNICAL SKILLS

• HTML, CSS, JavaScript, TypeScript (React.js, Node.js)	• AWS Cloud/ Azure
• Next.js	• Spring Boot
• PHP & SQL	• Python
• Java / C / C++	• Kotlin & Android Studio
• Power BI	• IoT
• Figma & UI Designing	• REST API Integration

PROFESSIONAL CERTIFICATIONS & QUALIFICATIONS

Coursera

- Data Analysis (*Currently Reading/Learning*)

Test Automation University

- Introduction to Playwright
- Advanced Playwright
- Web Element Locator Strategies

ESOFT Metro Campus, Kiribathgoda

- Diploma in Information Technology
- Diploma in English

LANGUAGES

- Sinhala - Native
- English - Fluent
